SUMMARY

AI-focused Software Engineer with hands-on experience building LLM-powered applications, AI agents, and backend systems using Python, JavaScript, REST APIs, and Gemini APIs. Strong foundation in Data Structures Algorithms, software engineering, and problem-solving. Passionate about AI automation, workflow orchestration, prompt engineering, backend integrations, and deploying scalable, production-ready AI solutions.

EXPERIENCE

- Eimple Lab | Web Development Internship** November, 2025 – July, 2026
 - Developed a full-stack web application using React.js and Tailwind CSS, creating a responsive and user-friendly interface for seamless navigation across devices.
 - Built backend services using Node.js and REST APIs, integrating PostgreSQL for structured and reliable data management.
 - Implemented reusable UI components, responsive layouts, and database-driven functionality to deliver an efficient and scalable web application.

PROJECTS

- AI Report Analyzer | Python, Streamlit, Gemini API, AI/LLM** | Python, Streamlit, Gemini API
 - Built an AI-powered report analysis application using Streamlit and Gemini API to analyze uploaded reports and generate concise, structured insights.
 - Automated document understanding by extracting key findings, summarizing complex content, and presenting actionable information through an interactive interface.
 - Designed a user-friendly workflow for report upload, AI-powered analysis, and result visualization, improving accessibility and reducing manual report-review effort.
- CivicFix – Civic Issue Reporting Platform | React.js, Node.js, Express.js, MongoDB, REST API, JWT** | Node.js, Express.js, MongoDB, REST API, JWT, Middleware
 - Developed a full-stack civic issue reporting platform enabling users to report, track, and monitor local problems such as potholes, garbage, streetlights, and drainage issues
 - Implemented JWT-based authentication, role-based access, RESTful APIs, and MongoDB integration for secure user and complaint management.
 - Built a responsive dashboard with complaint status tracking and structured issue data, enabling transparent communication between citizens and authorities.

TECHNICAL SKILLS

- CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems
- AI/ML:** LLM API Integration (Gemini, OpenAI, ChatGPT), Prompt Engineering, Python (DSA & scripting)
- Languages:** TypeScript, JavaScript, Python, Java, C/C++
- Backend:** Node.js, Express.js, REST API Design, JWT, Middleware
- Frontend:** React.js, Next.js, Tailwind CSS, Responsive Design
- Databases:** MongoDB, SQL
- Tools:** Git, GitHub, Postman, Netlify, Render, VS Code, Vercel

EDUCATION

B.Tech, Computer Science Engineering 2024–2028
YBN University, Ranchi CGPA: 8.10 (4 semesters)

CERTIFICATIONS & ACHIEVEMENTS

- Generative AI Studio** – Google Cloud (2025)
- Craft Precise Prompts for AI Model** – IBM (2026)
- Advanced Software Engineering Job Simulation** – Walmart (2026)
- Git Training** – SkillUp (2026)
- Cloud Infrastructure Analyst** – Skill India Digital Hub (2026)
- Customer Service Job Simulation** – Forage (2026)
- AI Quiz Ignite** – Nexus (2026)
- QuizOff 2026** – CampusCrew (2026)
- QuestUp 2026: India’s Biggest AI** – Falcon Sphere (2026)
- Deployed **3+ production web apps** with real-world users, integrating AI, authentication and REST APIs
